PRIME
DIGITAL SCHOOL

Future-Ready Digital Education · Vashi, Navi Mumbai

ADMISSIONS OPEN · ACADEMIC SESSION 2026–27

Student Brochure

14 career courses with module-wise syllabus and duration, a Future Skills Foundation Batch for 6th to 12th standard inspired by Japan and China, global placement assistance and 10 student facilities.

OUR 14 PROFESSIONAL COURSES

- Full-Stack Web Development
- Mobile App Development
- Python Programming
- Software Testing
- AWS & DevOps
- Cybersecurity
- AI & Machine Learning
- Data Science
- Data Analytics
- UI/UX Design
- Graphic Design & Motion Graphics
- Digital Content Creation
- Digital Marketing
- Entrepreneurship

14	6–12	275+	Global
Professional courses	Std. Foundation Batch	Students placed in 3 years	Placement assistance

CONTENTS

What is inside this brochure

Every section and every course, with page numbers. An A–Z index of courses, tools, certifications and topics is on page 31.

Welcome: Will AI take your job? 03

About Prime Digital School 04
- Founder's vision 04
- The Prime Advantage 04

What makes us different 05
- Prime vs a typical institute 05

Market Demand: What India's job market wants 06
- Job-market numbers with sources 06
- Fastest-growing skills 06

Programmes at a Glance 07
- All 14 courses in 5 groups 07
- How to choose your course 07

Course Details (one page per course) 08
- Group 1: Coding & Development 08
  - 01. Full-Stack Web Development 08
  - 02. Mobile App Development 09
  - 03. Python Programming 10
  - 04. Software Testing 11
- Group 2: Cloud & Security 12
  - 05. AWS & DevOps 12
  - 06. Cybersecurity 13
- Group 3: AI & Data 14
  - 07. AI & Machine Learning 14
  - 08. Data Science 15
  - 09. Data Analytics 16
- Group 4: Design & Creative 17
  - 10. UI/UX Design 17
  - 11. Graphic Design & Motion Graphics 18
  - 12. Digital Content Creation 19
- Group 5: Business & Growth 20
  - 13. Digital Marketing 20
  - 14. Entrepreneurship 21

Future Skills Foundation Batch (6th–12th) 22
- Learn like Japan and China 22
- What we take from the best school systems 22

10 future-skill subjects 23

Foundation levels and duration 24
- Explorers, Builders, Career Launch 24
- How every Foundation class runs 24

Robotics & Drone Study 25
- Why start early 25
- For parents 25

Top 10 Facilities 26
- Six core facilities 26
- Four new facilities 26
- Certificate and Skill Passport 26

Your Learning Journey 27
- Four steps from first class to first job 27
- How every topic is taught 27
- Who can join 27

Projects, Certificate & Career 28
- Project showcase 28
- Certificate and placement assistance 28
- Where these skills take you 28

Global Placement Assistance 29
- India, global-from-India and abroad tracks 29
- Global-ready in 8 steps 29

Admissions 30
- Steps to join 30
- Documents and eligibility 30
- Fees, scholarships and FAQs 30

Index A–Z 31

WELCOME

Welcome to Prime Digital School

Mumbai's No. 1 digital school platform, where school students, college students and working people learn the digital skills that today's jobs need, in simple language and with real practice.

LET'S START WITH A QUESTION

Is it true that AI will really take your job in the future?

AI	vs	Person without AI skills	vs	Person who knows AI
Fast, but needs someone to guide it		Doing work AI can now do faster		Gets the job and grows faster

The honest answer

AI is changing almost every job. It writes, designs, codes and analyses faster than ever. But AI does not decide what to build, check whether it is right or understand the customer. People do.

So AI will not simply replace people. **People who know how to use AI will replace people who don't.** The World Economic Forum expects about 170 million new jobs and 92 million jobs lost worldwide by 2030. The new jobs go to people with the new skills.

Become that person

275+ of our students have been placed in the last 3 years. At Prime Digital School you don't just learn theory. You learn the skill, practise it with AI tools, build real projects and leave with a portfolio that proves what you can do.

- Learn a skill companies are hiring for
- Use AI tools inside every course
- Build real projects, not just notes
- Get guidance until you are job-ready

Learn	Build	Show	Grow
Core concepts and tools, explained simply	Practical projects in every course	A portfolio that proves your skill	Internship, placement assistance and career guidance

> "Don't wait for the future. Get ready for it.

ABOUT US

Who we are

Prime Digital School is a modern learning platform where students attend classes, revise lessons, track their progress, get feedback and grow through guided mentorship. Our aim is simple: make learning clear, personal and focused on real results.

OUR FOUNDER'S VISION

Empowering students with future-ready skills through innovation, creativity and digital education.

Adv. Reena Kumari, Founder, Prime Digital School

The Prime Advantage: 10 things built into every course

Module-wise syllabus
Every course is broken into 8 clear modules, so you know exactly what you will learn before you join.

AI inside every course
Each course shows how AI tools are used in that job today, not as a separate add-on.

Practice after every topic
Assignments follow each topic, so learning turns into skill before the next class.

Live projects and a capstone
Three projects per course and a final capstone become your portfolio.

Global certification path
Each course names the international certifications its syllabus leads towards.

Market-demand guidance
We show you which skills India is hiring for, with sources, so you choose wisely.

Recorded lectures for life
Revise any lesson again, even years later, before an exam or interview.

24-hour mentor support
Doubts don't wait for class time, and neither do our mentors.

Global placement assistance
Internship, CV, portfolio and mock interviews, for jobs in India, remote work and abroad.

Future Skills for 6th–12th
AI, coding, robotics and drones for school students, modelled on Japan and China.

WHY PRIME DIGITAL SCHOOL

What makes us different

Many institutes teach software. We prepare you for the job market of today and the next ten years. Here is how learning at Prime Digital School compares with a typical computer institute.

What matters to you	Typical computer institute	Prime Digital School
Syllabus	Fixed syllabus, often several years old	**Updated for 2026 market demand, module by module, shown before you join**
AI	A short add-on course, if at all	**AI tools used inside every course, the way that job uses them today**
Practice	Notes and theory, practice at the end	**An assignment after every topic, 3 projects and a capstone per course**
Proof of skill	A completion certificate	**Portfolio, verifiable certificate, Skill Passport and a path to international certifications**
Missed a class	You miss the topic	**Offline + online classes and recorded lectures with lifetime access**
Doubts	Only during class time	**24-hour mentor support and a 24×7 AI study buddy**
Career help	Local job references	**Placement assistance in India and globally: remote jobs, freelance and abroad guidance**
Earning	Only after the course	**Earn While You Learn freelance desk during the course**
School students	Basic computer classes	**Future Skills Foundation Batch modelled on Japan and China: AI, coding, robotics, drones**
Parents	Little visibility	**Attendance and progress reports for parents**
Choosing a course	Advice based on what is popular	**Market-demand data with sources, and free counselling**

Market-first
We teach what India and the world are hiring for now.

AI-first
Every student learns to work with AI, not against it.

Career-first
From first class to first job, in India or abroad.

WHY THESE SKILLS, WHY NOW

What India's job market wants in 2026

Choosing a course is a career decision. Here is what recent research says about jobs and skills.

170M
new jobs worldwide by 2030, while 92M are displaced: a net gain of 78 million
World Economic Forum, Future of Jobs Report 2025

~40%
of the skills used at work are expected to change by 2030
World Economic Forum, Future of Jobs Report 2025

12–15%
expected growth in India's tech hiring in 2026, about 1.25 lakh new roles
Adecco India, January 2026

51%
growth in AI, data and cybersecurity roles in India in 2025
Adecco India, January 2026

1 in 10
open GenAI roles has a qualified engineer available
TeamLease Digital, Digital Skills & Salary Primer FY2025–26

US$19–22B
India's digital ad market by 2030, up from about US$11B in 2025
Redseer Consulting, April 2026

Fastest-growing skills, and where we teach them

Skill area	What the research says	Our courses
AI and big data	Top of the WEF list of fastest-growing skills; GenAI talent is in very short supply	AI & Machine Learning, Data Science, Data Analytics, Python
Networks and cybersecurity	Second on the WEF list; AI, data and security roles grew 51% in India (2025)	Cybersecurity, AWS & DevOps
Cloud computing	Cloud talent shortfall estimated at 55–60% of demand in India	AWS & DevOps
Software with AI	Demand for full-stack and data engineers with AI integration skills rose about 45%	Full-Stack, Mobile App, Software Testing
Digital marketing and content	Digital advertising in India is expected to roughly double by 2030	Digital Marketing, Content Creation, Graphic & Motion, UI/UX
Technological literacy and creative thinking	Third on the WEF skills list; needed in every job, including your own business	Entrepreneurship, Foundation Batch

Figures are forecasts by these organisations, not promises of jobs.

PROGRAMMES

14 courses, 5 career groups

Every course has a module-wise syllabus, uses AI tools, ends with projects for your portfolio and leads towards recognised certifications. Choose by what you enjoy, not by what sounds popular.

Group	Course	Duration	Starting level	Market demand	Page
Coding & Development	**01. Full-Stack Web Development**	6–9 months	Beginner	Very high	08
"	**02. Mobile App Development**	4–6 months	Beginner	High	09
"	**03. Python Programming**	2–3 months	Absolute beginner	Very high	10
"	**04. Software Testing**	3–4 months	Beginner	High	11
Cloud & Security	**05. AWS & DevOps**	4–6 months	Beginner	Very high	12
"	**06. Cybersecurity**	4–6 months	Beginner	Very high	13
AI & Data	**07. AI & Machine Learning**	6–8 months	Beginner (Python taught)	Very high	14
"	**08. Data Science**	5–7 months	Beginner (Python taught)	Very high	15
"	**09. Data Analytics**	3–4 months	Beginner, non-tech friendly	Very high	16
Design & Creative	**10. UI/UX Design**	3–4 months	Beginner, creative	High	17
"	**11. Graphic Design & Motion Graphics**	4–6 months	Beginner, creative	High for AI + motion	18
"	**12. Digital Content Creation**	2–3 months	Beginner, creative	High	19
Business & Growth	**13. Digital Marketing**	4 months	Beginner	High	20
"	**14. Entrepreneurship**	2–3 months	Anyone with an idea	Growing	21

Duration depends on the batch you choose: weekday batches finish nearer the shorter time, weekend batches nearer the longer time. Fast-track options may be available for some courses.

Not sure which to choose?

If you enjoy...	Start with	Then grow into
Logic, puzzles and building things	Python Programming	Full-Stack, AI & ML, Data Science
Numbers, Excel and business	Data Analytics	Data Science, Digital Marketing
Drawing, colours and visuals	Graphic Design & Motion Graphics	UI/UX Design, Content Creation
Hacking stories and online safety	Cybersecurity	AWS & DevOps
Videos, social media and talking to people	Digital Content Creation	Digital Marketing, Entrepreneurship

GROUP 1 OF 5

Coding & Development

Build websites, apps and software, and make sure they work.

CODING & DEVELOPMENT

Full-Stack Web Development

COURSE 01

DURATION	STARTING LEVEL	MODE	MARKET DEMAND	ENDS WITH
6–9 months	Beginner	Offline + Online	Very high	Capstone + certificate

Build complete websites and web apps: the screen the user sees, the server behind it and the database that stores the data.

WHY NOW

Demand for full-stack developers with AI integration skills rose about 45% in 2025 (Adecco India).

MODULE-WISE SYLLABUS

#	Module	Topics covered
01	**Web foundations**	How the web works, HTML5, forms, page structure
02	**Styling and responsive design**	CSS, Flexbox, Grid, mobile-first layouts, Tailwind CSS
03	**JavaScript essentials**	Variables, functions, arrays, objects, DOM, events, ES6+
04	**Git and teamwork**	Git, GitHub, branches, pull requests, code reviews
05	**Front-end with React and Next.js**	Components, props, state, hooks, routing, API calls
06	**Back-end with Node.js**	Express, REST APIs, routes, middleware, validation
07	**Databases**	MongoDB, SQL (MySQL / PostgreSQL), data models, queries
08	**Security, AI and going live**	Login, JWT, safe passwords, AI APIs, deploying on Vercel

TOOLS YOU WILL USE

VS Code · Git & GitHub · React · Next.js · Node.js · MongoDB · MySQL · Vercel

AI IN THIS COURSE

- AI assistants to write and debug code
- Adding chatbots and AI features to web apps through APIs
- Reviewing AI-written code for errors and security

PROJECTS YOU WILL BUILD

1. **Portfolio website** — Your own site, live online
2. **Community marketplace** — Listings, search and contact forms
3. **Booking app** — Login, database and AI assistant

CERTIFICATIONS THIS COURSE LEADS TOWARDS

- GitHub Foundations (preparation)

CAREER ROLES

Front-end Developer · Back-end Developer · Full-Stack Developer · Freelance Web Developer

CODING & DEVELOPMENT

Mobile App Development

COURSE 02

DURATION	STARTING LEVEL	MODE	MARKET DEMAND	ENDS WITH
4–6 months	Beginner	Offline + Online	High	Capstone + certificate

Create Android and iOS apps from a single codebase, connect them to real data and get them ready for the Play Store.

WHY NOW

Almost every business now wants an app; cross-platform skills let one developer serve both Android and iOS.

MODULE-WISE SYLLABUS

#	Module	Topics covered
01	**App thinking**	Screens, user flows, app types, simple app design in Figma
02	**Programming basics**	JavaScript and Dart essentials for apps
03	**React Native**	Components, styling, Expo, running on a real phone
04	**Flutter**	Widgets, layouts, state, hot reload
05	**Navigation and data**	Screens, forms, lists, app state, calling APIs
06	**Firebase back-end**	Login, cloud database, storage, push notifications
07	**Phone features**	Camera, location, files, offline storage
08	**Testing and publishing**	Debugging, building, Play Store listing and release

TOOLS YOU WILL USE

React Native · Flutter · Android Studio · Expo · Firebase · Figma

AI IN THIS COURSE

- AI assistants to build screens and fix errors
- Adding AI chat, image and voice features to apps
- AI help for app store descriptions and screenshots

PROJECTS YOU WILL BUILD

1. **Notes and to-do app** — Saved data and reminders
2. **Smart Home Hub** — Control lights and temperature from a React Native app
3. **Your own app** — Built and ready to publish

CERTIFICATIONS THIS COURSE LEADS TOWARDS

- Google Play Academy: Store Listing Certificate (preparation)

CAREER ROLES

Mobile App Developer · React Native Developer · Flutter Developer

CODING & DEVELOPMENT

Python Programming

COURSE 03

DURATION	STARTING LEVEL	MODE	MARKET DEMAND	ENDS WITH
2–3 months	Absolute beginner	Offline + Online	Very high	Capstone + certificate

Learn the world's most popular beginner language, the base for automation, data science and artificial intelligence.

WHY NOW

Python is the main language for AI, data and automation, the fastest-growing skill areas worldwide (WEF).

MODULE-WISE SYLLABUS

#	Module	Topics covered
01	**Getting started**	Installing Python, VS Code, Jupyter, your first programs
02	**Core building blocks**	Variables, data types, operators, input and output
03	**Decisions and loops**	if-else, for and while loops, patterns
04	**Functions and modules**	Writing functions, arguments, modules, packages
05	**Data structures**	Lists, tuples, dictionaries, sets
06	**Files and errors**	Reading and writing files, CSV, exceptions
07	**Object-oriented programming**	Classes, objects, inheritance
08	**Automation and problem solving**	requests, pandas basics, scripts, basic DSA practice

TOOLS YOU WILL USE

Python 3 · VS Code · Jupyter Notebook · PyCharm · Git

AI IN THIS COURSE

- ✓ Using AI to explain errors and suggest fixes
- ✓ Calling AI models from Python code
- ✓ Automating everyday tasks with Python and AI

PROJECTS YOU WILL BUILD

1. **Quiz game** — Scores, levels and saved results
2. **Automation script** — Sorts files and emails a report
3. **Expense tracker** — Monthly spending with charts

CERTIFICATIONS THIS COURSE LEADS TOWARDS

- ✓ PCEP / PCAP (Python Institute) (preparation)

CAREER ROLES

Python Developer · Automation Engineer · Foundation for Data and AI careers

CODING & DEVELOPMENT

Software Testing

COURSE 04

DURATION	STARTING LEVEL	MODE	MARKET DEMAND	ENDS WITH
3–4 months	Beginner	Offline + Online	High	Capstone + certificate

Find bugs before users do. Learn manual and automation testing, the skills every software company hires for.

WHY NOW

Every app and website must be tested; automation testers with AI-tool skills are especially sought after.

MODULE-WISE SYLLABUS

#	Module	Topics covered
01	**Testing fundamentals**	SDLC, STLC, why testing matters, types of testing
02	**Manual testing**	Test cases, test scenarios, bug life cycle, bug reports
03	**Testing types**	Functional, regression, smoke, sanity, UAT
04	**Agile and tools**	Scrum, sprints, JIRA
05	**Java or Python for testers**	Basic programming needed for automation
06	**Selenium automation**	Locators, WebDriver, TestNG / PyTest, frameworks
07	**API and database testing**	Postman, REST APIs, SQL for testers
08	**Performance and AI testing tools**	JMeter basics, AI-assisted test generation

TOOLS YOU WILL USE

Selenium · Postman · JIRA · TestNG / PyTest · JMeter · Git

AI IN THIS COURSE

- Generating test cases and test data with AI
- AI tools that heal broken automation scripts
- Testing AI features such as chatbots

PROJECTS YOU WILL BUILD

1. **Website test plan** — Test cases and bug report for a live website
2. **Selenium suite** — Automated login and checkout tests
3. **API test collection** — Automated checks in Postman

CERTIFICATIONS THIS COURSE LEADS TOWARDS

- ISTQB Certified Tester Foundation Level (preparation)

CAREER ROLES

QA Engineer · Manual Tester · Automation Test Engineer

GROUP 2 OF 5

Cloud & Security

Run software in the cloud and keep systems and data safe.

CLOUD & SECURITY

AWS & DevOps

COURSE 05

DURATION	STARTING LEVEL	MODE	MARKET DEMAND	ENDS WITH
4–6 months	Beginner	Offline + Online	Very high	Capstone + certificate

Put applications on the cloud and ship updates quickly and safely, the way modern tech teams work.

WHY NOW

India's cloud talent shortfall is put at 55–60% of demand (TeamLease Digital).

MODULE-WISE SYLLABUS

#	Module	Topics covered
01	**Linux and scripting**	Linux commands, files, users, shell scripting
02	**Networking for the cloud**	IP, DNS, ports, load balancers
03	**AWS core services**	EC2, S3, IAM, VPC, RDS, Route 53
04	**Version control for teams**	Git workflows, branching strategies
05	**CI/CD pipelines**	Jenkins, GitHub Actions, automated testing and deployment
06	**Containers**	Docker images, containers, Docker Compose
07	**Kubernetes**	Pods, deployments, services, scaling
08	**Infrastructure as Code and monitoring**	Terraform, CloudWatch, alerts, cost control

TOOLS YOU WILL USE

AWS · Linux · Docker · Kubernetes · Jenkins · GitHub Actions · Terraform

AI IN THIS COURSE

- AI assistants for scripts and cloud configuration
- Deploying AI models and apps on AWS
- Using AI to read logs and find problems

PROJECTS YOU WILL BUILD

1. **Website on AWS** — Hosted, secured and live
2. **CI/CD pipeline** — Tests and deploys automatically
3. **Kubernetes app** — Containerised app that scales

CERTIFICATIONS THIS COURSE LEADS TOWARDS

- AWS Certified Cloud Practitioner (preparation)
- AWS Solutions Architect – Associate (preparation)

CAREER ROLES

Cloud Engineer · DevOps Engineer · Cloud Support Associate

CLOUD & SECURITY

Cybersecurity

COURSE 06

DURATION	STARTING LEVEL	MODE	MARKET DEMAND	ENDS WITH
4–6 months	Beginner	Offline + Online	Very high	Capstone + certificate

Protect systems, networks and data from attacks. Every practical is done ethically, in safe practice labs.

WHY NOW

AI, data and cybersecurity roles grew 51% in India in 2025 (Adecco India).

MODULE-WISE SYLLABUS

#	Module	Topics covered
01	**Networking basics**	OSI and TCP/IP models, IP addressing, ports, protocols
02	**Linux and Kali Linux**	Commands, permissions, security tools
03	**Cyber threats**	Malware, phishing, social engineering, ransomware
04	**Ethical hacking method**	Reconnaissance, scanning, enumeration, safe testing
05	**Web application security**	OWASP Top 10, Burp Suite, common web attacks
06	**Network security**	Firewalls, VPNs, Wi-Fi security, IDS
07	**Cryptography**	Encryption, hashing, certificates
08	**Defence and law**	Incident response, logs, SIEM basics, IT Act and cyber law in India

TOOLS YOU WILL USE

- Kali Linux
- Nmap
- Wireshark
- Burp Suite
- Metasploit (lab only)

AI IN THIS COURSE

- AI tools that spot threats in logs
- Recognising AI-made phishing and deepfakes
- Securing AI systems and chatbots

PROJECTS YOU WILL BUILD

1. **Vulnerability scanner**
   Finds basic risks in a local lab network
2. **Security audit**
   Report for a sample website
3. **Awareness campaign**
   Anti-phishing guide for students

CERTIFICATIONS THIS COURSE LEADS TOWARDS

- CompTIA Security+ (preparation)
- EC-Council CEH (preparation)

CAREER ROLES

- Security Analyst
- SOC Analyst
- Junior Penetration Tester

GROUP 3 OF 5

AI & Data

Teach machines to learn and turn numbers into decisions.

AI & DATA

AI & Machine Learning

COURSE 07

DURATION	STARTING LEVEL	MODE	MARKET DEMAND	ENDS WITH
6–8 months	Beginner (Python taught)	Offline + Online	Very high	Capstone + certificate

Understand how AI works and build your own models, from simple predictions to chatbots and image recognition.

WHY NOW

For every 10 open GenAI roles, only about one qualified engineer is available (TeamLease Digital).

MODULE-WISE SYLLABUS

#	Module	Topics covered
01	**Python for AI**	NumPy, pandas, Jupyter
02	**Maths made simple**	Statistics, probability, vectors and matrices
03	**Supervised learning**	Regression, classification, decision trees
04	**Unsupervised learning**	Clustering, dimensionality reduction
05	**Model evaluation**	Accuracy, precision, recall, overfitting, tuning
06	**Deep learning**	Neural networks, TensorFlow / Keras, PyTorch
07	**NLP, vision and generative AI**	Text, images, LLMs, embeddings, RAG basics
08	**Prompt engineering and deployment**	Prompting, AI agents basics, Streamlit apps, responsible AI

TOOLS YOU WILL USE

Python · scikit-learn · TensorFlow · PyTorch · Hugging Face · Streamlit

AI IN THIS COURSE

- ✓ Building, not just using, AI models
- ✓ Connecting large language models to your own data
- ✓ Ethics, bias and safe use of AI

PROJECTS YOU WILL BUILD

1. **Price prediction model** — Predicts house prices from data
2. **AI chatbot** — Answers school admission questions
3. **Image classifier** — Web app that recognises images

CERTIFICATIONS THIS COURSE LEADS TOWARDS

- ✓ Microsoft Azure AI Fundamentals AI-900 (preparation)
- ✓ AWS Certified AI Practitioner (preparation)

CAREER ROLES

AI Engineer · Machine Learning Engineer · AI Product Associate

AI & DATA

Data Science

COURSE 08

DURATION	STARTING LEVEL	MODE	MARKET DEMAND	ENDS WITH
5–7 months	Beginner (Python taught)	Offline + Online	Very high	Capstone + certificate

Clean, explore and model data to find patterns and predict what will happen next.

WHY NOW

AI and big data top the World Economic Forum's list of fastest-growing skills to 2030.

MODULE-WISE SYLLABUS

#	Module	Topics covered
01	**Python and pandas**	DataFrames, cleaning, merging, grouping
02	**Exploratory data analysis**	Finding patterns, outliers and trends
03	**Statistics**	Distributions, sampling, hypothesis testing
04	**Visualisation**	Matplotlib, Seaborn, Plotly
05	**SQL**	Queries, joins, aggregations
06	**Machine learning**	Prediction and classification models
07	**Real datasets**	Working with public datasets end to end
08	**Data storytelling**	Reports, dashboards, presenting to managers

TOOLS YOU WILL USE

Python · Jupyter · pandas · scikit-learn · SQL · Matplotlib · Seaborn

AI IN THIS COURSE

- ✓ AI assistants for analysis code and charts
- ✓ Using AI to summarise findings
- ✓ Machine learning as the core of the course

PROJECTS YOU WILL BUILD

1. **Sales forecast**
   Predicts next quarter's sales
2. **Customer segmentation**
   Groups customers for marketing
3. **Stock market simulator**
   Dashboard of trends and portfolio growth

CERTIFICATIONS THIS COURSE LEADS TOWARDS

- ✓ Microsoft Azure Data Scientist Associate DP-100 (preparation)

CAREER ROLES

Data Scientist · Data Analyst · Business Analyst

AI & DATA

Data Analytics

COURSE 09

DURATION	STARTING LEVEL	MODE	MARKET DEMAND	ENDS WITH
3–4 months	Beginner, non-tech friendly	Offline + Online	Very high	Capstone + certificate

Turn business data into reports and dashboards that managers use to make decisions.

WHY NOW

Every company now runs on data; analysts who can use AI tools are needed across BFSI, retail and healthcare.

MODULE-WISE SYLLABUS

#	Module	Topics covered
01	**Excel essentials**	Formulas, lookups, pivot tables, charts
02	**Advanced Excel**	Power Query, dashboards, what-if analysis
03	**SQL**	Queries, filters, joins, aggregations
04	**Power BI**	Data models, DAX basics, interactive reports
05	**Tableau**	Visualisations and dashboards
06	**Python for analysis**	pandas basics, charts
07	**Business KPIs**	Sales, marketing, HR and finance metrics, MIS reports
08	**Insights and presentation**	Recommendations, storytelling, presenting

TOOLS YOU WILL USE

Excel · Google Sheets · SQL · Power BI · Tableau · Python

AI IN THIS COURSE

- Copilot-style AI in Excel and Power BI
- Writing SQL with AI help and checking it
- AI summaries for management reports

PROJECTS YOU WILL BUILD

1. **Sales dashboard** — Interactive Power BI report
2. **HR analysis** — Attendance and attrition report
3. **Business review** — Insights with clear recommendations

CERTIFICATIONS THIS COURSE LEADS TOWARDS

- Microsoft Power BI Data Analyst PL-300 (preparation)

CAREER ROLES

Data Analyst · MIS Executive · BI Analyst · Business Analyst

GROUP 4 OF 5

Design & Creative

Design screens, brands, graphics and videos people love.

DESIGN & CREATIVE

UI/UX Design

COURSE 10

DURATION	STARTING LEVEL	MODE	MARKET DEMAND	ENDS WITH
3–4 months	Beginner, creative	Offline + Online	High	Capstone + certificate

Design apps and websites that are easy and pleasant to use, from research to a clickable prototype.

WHY NOW

Every app and website needs designers who understand users; AI-assisted design speeds up the work.

MODULE-WISE SYLLABUS

#	Module	Topics covered
01	**Design thinking**	Empathise, define, ideate, prototype, test
02	**User research**	Interviews, surveys, personas, journey maps
03	**Information architecture**	Site maps, user flows, card sorting
04	**Wireframing**	Low and mid-fidelity layouts
05	**Visual UI design**	Layout, grids, colour, typography, icons
06	**Design systems**	Components, variants, auto layout
07	**Prototyping**	Interactions and animations in Figma
08	**Testing and handoff**	Usability tests, accessibility, developer handoff

TOOLS YOU WILL USE

Figma · FigJam · Adobe XD · Miro

AI IN THIS COURSE

- AI tools for quick layouts and ideas
- AI-generated research summaries
- Designing interfaces for AI products

PROJECTS YOU WILL BUILD

1. **App redesign**
   Full case study
2. **Website prototype**
   Wireframes to clickable prototype
3. **UX portfolio**
   Three case studies

CERTIFICATIONS THIS COURSE LEADS TOWARDS

- Google UX Design Certificate (preparation)

CAREER ROLES

UI Designer · UX Designer · Product Designer

DESIGN & CREATIVE

Graphic Design & Motion Graphics

COURSE 11

DURATION	STARTING LEVEL	MODE	MARKET DEMAND	ENDS WITH
4–6 months	Beginner, creative	Offline + Online	High for AI + motion	Capstone + certificate

Create logos, brand kits, social media posts and print designs, then bring them to life with animation.

WHY NOW

Simple static design is being automated; designers who use AI tools and create motion graphics stay in demand.

MODULE-WISE SYLLABUS

#	Module	Topics covered
01	**Design principles**	Balance, contrast, hierarchy, colour theory, typography
02	**Photoshop**	Photo editing, retouching, compositing
03	**Illustrator**	Logos, icons, vector illustration
04	**Branding**	Brand identity, style guides, packaging
05	**Social and print creatives**	Posts, ads, brochures, banners, print files
06	**Canva and AI design tools**	Fast everyday content, generative fill, AI images
07	**After Effects**	Motion graphics, kinetic text, transitions
08	**Portfolio**	Logo animation, explainer basics, Behance portfolio

TOOLS YOU WILL USE

Photoshop · Illustrator · InDesign · Canva · After Effects · Premiere Pro

AI IN THIS COURSE

- Adobe Firefly and generative fill
- AI image generation, used legally and creatively
- Speeding up resizing and variations

PROJECTS YOU WILL BUILD

1. **Brand identity kit** — Logo, colours, type and templates
2. **Social campaign** — Set of posts and ads
3. **Motion intro** — Animated logo and title

CERTIFICATIONS THIS COURSE LEADS TOWARDS

- Adobe Certified Professional: Photoshop / Illustrator (preparation)

CAREER ROLES

Graphic Designer · Motion Graphics Designer · Brand Designer

DESIGN & CREATIVE

Digital Content Creation

COURSE 12

DURATION	STARTING LEVEL	MODE	MARKET DEMAND	ENDS WITH
2–3 months	Beginner, creative	Offline + Online	High	Capstone + certificate

Plan, shoot, edit and grow content for Reels, Shorts and YouTube, and build a personal brand.

WHY NOW

Brands spend more on creators and short video every year, and need people who can plan, shoot and edit.

MODULE-WISE SYLLABUS

#	Module	Topics covered
01	**Niche and strategy**	Finding your niche, audience, content pillars
02	**Scripts and hooks**	Writing scripts, hooks, storytelling
03	**Phone shooting**	Framing, light, sound, B-roll
04	**Video editing**	Premiere Pro, DaVinci Resolve, VN Video Editor
05	**Platforms**	Reels, Shorts, YouTube long-form, algorithms
06	**Packaging**	Thumbnails, titles, captions, posting strategy
07	**AI for creators**	AI scripts, voice, captions, editing
08	**Growth and money**	Analytics, brand deals, monetisation, ASCI disclosure rules

TOOLS YOU WILL USE

- Premiere Pro
- DaVinci Resolve
- VN Video Editor
- Canva
- AI tools
- YouTube Studio

AI IN THIS COURSE

- AI scripts, captions and voice-overs
- AI editing and repurposing long videos into shorts
- Disclosing AI and paid content correctly

PROJECTS YOU WILL BUILD

1. **Content calendar**
   30 days of planned posts
2. **Reels series**
   10 Reels or Shorts
3. **YouTube launch**
   Your channel, set up and live

CERTIFICATIONS THIS COURSE LEADS TOWARDS

- Adobe Certified Professional: Premiere Pro (preparation)

CAREER ROLES

Content Creator · Video Editor · Social Media Content Specialist

GROUP 5 OF 5

Business & Growth

Market products, grow brands and start your own business.

BUSINESS & GROWTH

Digital Marketing

COURSE 13

DURATION	STARTING LEVEL	MODE	MARKET DEMAND	ENDS WITH
4 months	Beginner	Offline + Online	High	Capstone + certificate

Master in Digital Marketing with AI: a 4-month programme with 24 modules, live projects and a full Student Handbook.

WHY NOW

India's digital ad market, about US$11 billion in 2025, is projected to reach US$19–22 billion by 2030 (Redseer).

MODULE-WISE SYLLABUS

#	Module	Topics covered
01	**Month 1: Foundations**	Digital marketing landscape, websites and landing pages, SEO, local SEO, AI search
02	**Month 1: AI for marketers**	AI tools, prompts and workflows for marketing
03	**Month 2: Content and social**	Content strategy, AI copywriting, social media, YouTube
04	**Month 2: Creative skills**	Graphic design, Canva, video shooting and editing, AI creative tools
05	**Month 3: Performance marketing**	Tracking, Google Ads, Meta Ads, LinkedIn Ads
06	**Month 3: Automation and analytics**	Email and WhatsApp automation, GA4, AI reporting
07	**Month 4: Advanced**	Marketing automation and chatbots, e-commerce and marketplaces
08	**Month 4: Career**	Personal branding, freelancing, marketing law, capstone project

TOOLS YOU WILL USE

- Google Ads
- Meta Ads Manager
- Google Analytics 4
- Search Console
- Canva
- ChatGPT

AI IN THIS COURSE

- AI in every module: content, ads, design and reporting
- 165 ready AI prompts in the handbook
- AI chatbots and automation for leads

PROJECTS YOU WILL BUILD

1. **3 monthly live projects**
   Plus a final capstone
2. **245 homework tasks**
   One after every topic
3. **Student Handbook**
   24 chapters, included

CERTIFICATIONS THIS COURSE LEADS TOWARDS

- Google Ads and Google Analytics (Skillshop) (preparation)
- Meta Certified Digital Marketing Associate (preparation)

CAREER ROLES

Digital Marketing Executive · SEO Specialist · Performance Marketer · Social Media Manager

BUSINESS & GROWTH

Entrepreneurship

COURSE 14

DURATION	STARTING LEVEL	MODE	MARKET DEMAND	ENDS WITH
2–3 months	Anyone with an idea	Offline + Online	Growing	Capstone + certificate

Turn an idea into a real business: test it, build a first version, market it and pitch it.

WHY NOW

AI and no-code tools now let a small team build and launch a product quickly and cheaply.

MODULE-WISE SYLLABUS

#	Module	Topics covered
01	**Ideas**	Finding problems worth solving, testing ideas
02	**Market research**	Customer interviews, competitors, market size
03	**Business model**	Business Model Canvas, value proposition
04	**Build an MVP**	No-code tools, AI tools, landing pages
05	**Marketing on a budget**	Branding, social media, first customers
06	**Money matters**	Pricing, costs, profit, simple finance
07	**Legal basics in India**	Business registration, GST basics, Startup India
08	**Pitch and funding**	Pitch deck, Demo Day, ways to raise funds

TOOLS YOU WILL USE

- Business Model Canvas
- Google Forms
- Canva
- Excel
- No-code builders
- AI tools

AI IN THIS COURSE

- ✓ AI as your research, design and marketing team
- ✓ Building an MVP with AI and no-code tools
- ✓ AI for business plans and pitch decks

PROJECTS YOU WILL BUILD

1. **Idea validation**
   Report with real customer feedback
2. **MVP launch**
   A first version of your product
3. **Pitch deck**
   Presented on Demo Day

CERTIFICATIONS THIS COURSE LEADS TOWARDS

- ✓ Startup India Learning Programme (guidance)

CAREER ROLES

- Startup Founder
- Business Development Executive
- Agency or Freelance Owner

FUTURE SKILLS FOUNDATION BATCH · 6TH TO 12TH STANDARD

Learn like Japan and China, right here in Navi Mumbai

The countries leading in technology now start digital and AI education in school. Here is what students in Japan, China and India are required to learn, and how our Foundation Batch brings the same future skills to 6th–12th standard students, explained simply.

JP Japan

- Coding has been compulsory in every elementary school since April 2020.
- "Informatics I" is a compulsory high-school subject. Since 2025 it is part of the national university entrance exam (Common Test), and about a quarter of that exam is programming.
- Why: the government projected a shortage of up to 590,000 IT workers by 2030.

CN China

- The Ministry of Education issued a national General AI Education Guide for primary and secondary schools in May 2025.
- Beijing requires at least 8 class hours of AI per school year from September 2025; Guangdong sets 6–10 hours a year by grade.
- Step by step: primary students experience AI and visual coding, junior high learns machine-learning basics and AI projects, senior high builds simple models.

IN India

- AI and Computational Thinking will be taught from Class 3 from the 2026–27 session (Ministry of Education, October 2025).
- Based on NEP 2020 and NCF-SE 2023; CBSE and NCERT are framing the curriculum.
- Students who learn these skills early will find school AI, maths and science easier.

What we take from the best school systems

Start early

Like Japan, coding and computational thinking from the middle-school years, not after college.

Grade by grade

Like China's guide, each level builds on the last: experience, understand, then create.

Learn by making

Inspired by Japan's *monozukuri*, the craft of making things: every topic ends in something students build.

AI with values

Safe, honest use of AI: spotting fake news and deepfakes, privacy and good digital manners.

Sources: Japan: GardnerWeb (2019) on compulsory elementary coding from 2020 and the METI IT-worker projection; IAFOR IICE 2026 paper on Informatics I in the Common Test. China: Australian Government Department of Education, "China's approach to AI education in primary and secondary schools"; China Daily, 21 October 2025. India: Ministry of Education announcement reported by Careers360, 30 October 2025.

FUTURE SKILLS FOUNDATION BATCH · SUBJECTS

10 future-skill subjects, grade by grade

Chosen from what today's job market and the new school curricula need. Every subject grows with the student, so a 6th standard explorer becomes a 12th standard builder with a real portfolio.

Subject	Level 1 · Explorers 6th – 8th Std.	Level 2 · Builders 9th – 10th Std.	Level 3 · Career Launch 11th – 12th Std.
AI Literacy & Safe AI	What AI is, talking to AI, spotting deepfakes	Prompt writing, AI for study and projects	How AI learns, machine-learning basics, AI ethics
Coding & Computational Thinking	Logic puzzles, Scratch block coding	Python programming	Advanced Python, JavaScript, algorithms
Web & App Making	Make a simple app with blocks	HTML and CSS websites	Web apps and mobile app basics
Data & Spreadsheets	Collect data, make charts	Spreadsheets, formulas, simple surveys	Data analysis with Python, dashboards
Robotics & IoT	Robot kits, sensors explained	Arduino, circuits, smart gadgets	IoT projects controlled from a phone
Drones	How drones fly, parts and safety	Assembly, controls, supervised flying	Drone uses, mapping, careers, Drone Rules
Game Design & Animation	Scratch games and animated stories	2D game design	Game logic and simple 3D games
3D Design & Making	Tinkercad 3D models	Product design for real problems	Design-to-prototype projects
Digital Creativity	Canva posters, simple video	Graphic design and video editing	Content portfolio, personal brand
Cyber Safety & Money Smarts	Online safety, strong passwords	Privacy, scams, digital payments safety	Ethical-hacking basics, mini-business and money basics

Explained simply

Short lessons, everyday examples and hands-on activities, made for school students.

Helps at school

Supports the new AI and Computational Thinking curriculum, and makes maths and science come alive.

Contests and showcases

Guidance for coding, robotics and innovation competitions, plus a project showcase every term.

FUTURE SKILLS FOUNDATION BATCH · LEVELS

Three levels, one clear path

Students join the level that matches their standard. Each level runs for one academic year and ends with a showcase and a level certificate.

LEVEL 1
Explorers
6th – 8th Std.

DURATION
1 academic year per level

BATCHES
After school and weekends

FOCUS
Curiosity, logic and safe digital habits

STUDENTS BUILD
- Animated story and simple game
- Smart robot that follows a line
- Poster and short video with Canva

OUTCOME
Confident, safe digital learner

LEVEL 2
Builders
9th – 10th Std.

DURATION
1 academic year per level

BATCHES
After school and weekends

FOCUS
Building real things with code and electronics

STUDENTS BUILD
- Personal website
- Smart gadget with Arduino
- Python quiz app with data

OUTCOME
Projects to show in school and online

LEVEL 3
Career Launch
11th – 12th Std.

DURATION
1 academic year per level

BATCHES
After school and weekends

FOCUS
Advanced skills and career direction

STUDENTS BUILD
- AI mini-app
- IoT device controlled from a phone
- Career portfolio and personal website

OUTCOME
Clear career path and a strong portfolio

How every Foundation class runs

1. **Think** — A logic puzzle to warm up the brain
2. **Learn** — One new idea, explained with a daily-life example
3. **Make** — Build it with code, kits or design tools
4. **AI corner** — See how AI helps, and when not to trust it
5. **Show** — Present the work to the class

FOUNDATION BATCH · HANDS-ON TECHNOLOGY

Robotics & Drone Study

Students learn science and coding by building things that move. Robotics and drone study turns physics, maths and programming into something children can see, touch and control.

Robotics

- How robots sense, think and move
- Motors, sensors and circuits explained simply
- Programming robots with block code and Arduino
- Line-follower, obstacle-avoider and smart-home models
- IoT: controlling devices from a phone
- Team challenges and robotics competitions

Drones

- How drones fly: lift, thrust and balance
- Drone parts: frame, motors, propellers, battery, controller
- Assembly and basic programming
- Safe flying practice under trainer supervision
- India's Drone Rules, 2021 and responsible flying
- Uses in farming, mapping, delivery and photography

Why start early?

Curiosity becomes skill

Children who build things early understand science and maths better at school.

Better career choices

By 12th, students know whether they enjoy coding, design, data or engineering.

A portfolio before college

Projects and certificates that stand out in college and course applications.

For parents

Regular updates
Attendance and progress reports so you always know how your child is doing.

Fits around school
After-school and weekend batches. Confirm the current timings with our counsellors.

Safe learning
Supervised practicals, safe use of the internet and AI, and trained mentors.

Offline + online
Classroom learning at Vashi or live online classes from home.

FACILITIES

Top 10 facilities every student gets

Learning a skill is only half the work. These facilities make sure you understand it, practise it, prove it and turn it into a career, in India or anywhere in the world.

01 Offline + Online Classes

Learn in our Vashi classroom or live online from home. Miss a classroom session? Follow it online.

02 Recorded Lectures, Lifetime Access

Every important lecture is recorded. Revise any time before tests and interviews, for life.

03 Live Projects

Real project briefs, planned, built and presented the way a company works.

04 Internship

Real work experience, so your CV shows practice and not only a course name.

05 Placement Assistance

CV, portfolio, mock interviews and job opportunities to help you land the right role.

06 24-Hour Mentor Support

Stuck late at night? Reach our mentors any time. Help is there when you need it.

07 AI Learning Lab + AI Study Buddy

Practise on the AI tools companies use, and get instant help from an AI study buddy trained on your course notes, day or night.

NEW

08 Global Career Cell

Placement help beyond India: remote jobs with international companies, global freelance clients and study-or-work-abroad guidance.

NEW

09 Earn While You Learn

A freelance desk that helps you set up your profile and win your first paid project during the course.

NEW

10 Hackathons, Demo Days & Masterclasses

Compete, present to industry guests and learn from working professionals through regular events.

NEW

Plus: a verifiable certificate and a Skill Passport

Finish your course and capstone to receive a Prime Digital School certificate with a unique ID that can be verified online, and a digital record of every skill and project you completed.

HOW IT WORKS

Your learning journey

From your first class to your first job, here is how a course at Prime Digital School works.

1

Choose your path

Talk to our counsellor, explore the courses and pick the one that matches your interest and goal.

2

Learn by doing

Live classes, practical sessions and AI tools. Every topic is followed by practice, not just theory.

3

Build your portfolio

Assignments, live projects and a final capstone project that show employers what you can do.

4

Get certified, get placed

Earn your certificate, prepare with mock interviews and get placement assistance.

How every topic is taught

Stage	What happens	What you get
1. Learn	Trainer explains the concept with simple, real Indian examples	Clear understanding of the basics
2. Watch	Live demonstration of the tool or technique	You see exactly how professionals do it
3. Practise	You do it yourself in class with mentor help	Confidence with the real tool
4. Use AI	Learn how AI tools speed up the same work	Faster, modern way of working
5. Assignment	Homework or a task after the topic	Practice that makes it stick
6. Review	Mentor checks your work and gives feedback	You know what to improve

What you walk away with

- A skill companies are hiring for
- A portfolio of real projects
- A verifiable certificate
- Internship experience
- Interview and CV preparation

Who can join

- School students: Foundation Batch, 6th to 12th
- College students and fresh graduates
- Working professionals who want to upskill
- Business owners and aspiring entrepreneurs
- Anyone who wants to start a career in tech

PROJECTS

Projects you can build

Examples of the kind of real-world projects students build across our courses. Every course ends with a capstone project for your portfolio.

Smart Home Hub
A mobile app that controls lights and temperature, built with React Native.

Community Website
A local marketplace website built with HTML, CSS and JavaScript.

AI Chatbot
A chatbot trained to answer school admission and office questions.

Vulnerability Scanner
A tool that finds basic security risks in a local lab network.

Stock Market Simulator
A dashboard that shows financial trends and portfolio growth.

Live Marketing Campaign
A real campaign with ads, content and a results report.

Your certificate

- Given on completing the course and the final capstone project
- Unique certificate ID for online verification
- Shows practical, project-based learning
- Add it to your CV and LinkedIn profile

Placement assistance (India + global)

275+ students placed in the last 3 years

- CV, LinkedIn and portfolio building
- Mock interviews and interview preparation
- Job and internship opportunities in India and abroad
- Freelancing guidance

Where these skills take you

Industry	Roles you can apply for	Related courses
Tech startups and IT companies	Web Developer, App Developer, QA Engineer, Cloud / DevOps Engineer	Full-Stack, Mobile App, Python, Testing, AWS & DevOps
Banking, finance and analytics	Data Analyst, Data Scientist, Business Analyst, MIS Executive	Data Analytics, Data Science, AI & ML
Global capability centres (GCCs)	Cloud, security, data and AI roles	AWS & DevOps, Cybersecurity, AI & ML, Data Science
Agencies, media and brands	Designer, Video Editor, Content Creator, Digital Marketer	UI/UX, Graphic & Motion, Content Creation, Digital Marketing
Your own business	Founder, Freelancer, Agency Owner	Entrepreneurship, Digital Marketing

GLOBAL CAREER CELL

Global placement assistance

275+ students placed in the last 3 years. Your skill can earn anywhere in the world. Our placement assistance works on three tracks, so you can build a career in India, work for international clients from home, or prepare to study or work abroad.

TRACK 1 · INDIA
Jobs in India

- IT companies and startups
- Global capability centres (GCCs) in India, expected to add over 1.2 million tech jobs by 2027 (TeamLease Digital)
- Agencies, media houses and brands

TRACK 2 · REMOTE
Work for the world

- Remote roles with international companies
- Freelance clients on platforms such as Upwork, Fiverr and LinkedIn
- Profiles and portfolios built for international clients

TRACK 3 · ABROAD
Study or work abroad

- Which countries need which skills, and the certifications they recognise
- Language basics guidance, for example Japanese for Japan's IT sector
- Guidance on study and work pathways; visas are handled by employers or authorised agencies

Global-ready in 8 steps

01 International CV & LinkedIn
Formats that recruiters in India, the Gulf, Europe, the US and Japan expect

02 Global portfolio
GitHub, Behance, Dribbble or Kaggle, depending on your course

03 International certifications
AWS, Microsoft, Google, CompTIA, ISTQB, Adobe, Meta

04 Business English
Emails, video calls, presenting your work with confidence

05 Global-style mock interviews
Video interviews, take-home tasks and live coding or design rounds

06 Remote-work skills
Time zones, Slack, Jira, Git and clear written updates

07 Global job search
LinkedIn, company career pages and international job boards

08 Freelance launch
Profile, pricing, proposals and your first international client

Please note: placement assistance is preparation and opportunities, not a job guarantee. Visas, work permits and admissions abroad are decided by employers, universities and each country's authorities.

ADMISSIONS OPEN · 2026–27

How to join

Joining Prime Digital School is simple. Seats in each batch are limited, so start early.

1

Explore & counselling

Visit us, call or WhatsApp. Our counsellor helps you choose the right course and batch.

2

Check eligibility

Confirm the course level, batch timing and mode (offline or online) that suits you.

3

Submit application

Fill in the admission form and submit the required documents.

4

Confirm & start

Complete the admission formalities and fee, then join your first class.

Documents required

- Latest academic records (marksheet)
- Student ID or Aadhaar card
- Passport-size photograph
- Address proof

Eligibility

- Foundation Batch: students of 6th to 12th standard
- Professional courses: school leavers, college students, graduates and working people
- Most courses start from the basics; some need basic computer use

Topic	Details
Fees	Fees depend on the course, duration and level. Flexible payment options are available.
Scholarships	Merit-based and need-based scholarships may be available for eligible students. Ask your counsellor.
Batch timings	Different batches through the week. Confirm the current timings with our team.
Certification exams	International certification exams are taken and paid for separately with the certifying body.

Frequently asked questions

Do I need coding experience to join?
No. Most courses start from the basics and build step by step.

Is a job guaranteed?
We provide placement assistance in India and globally: CV, portfolio, mock interviews and opportunities. Your skill and effort decide the result.

How long is a course?
Between 2 and 9 months depending on the course and batch; each course page shows its duration range.
